

After years of refining your ArcSight deployment, your organization is moving to a new platform. To what degree will your security posture be impacted? How long will it take to see actionable results from your new solution? Reduced time to value is a major concern for customers transitioning from ArcSight. We've created this service to streamline your platform's transformation.

At LogRhythm, we recognize the work you and your organization put into configuring your ArcSight deployment. With our dedicated focus on delivering a best-in-breed security solution, we maintain a strong track record of helping organizations get the most value out of their previous ArcSight platform when switching to LogRhythm.

Building upon our continuing success in transitioning former ArcSight customers to the LogRhythm platform, we created the ArcSight to LogRhythm Transition Service. This service aims to minimize interruptions while helping you understand how to reuse your ArcSight content within LogRhythm. Plus, we help you adopt the feature sets of LogRhythm's Threat Lifecycle Management platform that distinguish us from other security vendors, such as case management and out-of-the-box threat detection content.

### ArcSight to LogRhythm Transition Service at a Glance

- ✓ Minimal interruption when switching from ArcSight to LogRhythm
- ✓ Guidance on how to reuse your ArcSight content within LogRhythm
- ✓ LogRhythm's Core Deployment and Threat Management Foundations Service
- ✓ Enable out-of-the-box LogRhythm Core Threat content and security automation and orchestration

### Reuse your ArcSight Content

To expedite utility of your LogRhythm deployment, we will help you identify existing ArcSight correlation rules and events in order to translate these preferred functionalities into your new LogRhythm platform, employing the threat detection capabilities therein. With LogRhythm, you will realize new use cases within a more efficient and robust workflow. You will also experience faster time to value when you switch platforms. With our ArcSight to LogRhythm Transition Service, you will:

- Import existing list content to LogRhythm
- Import the ArcSight Asset Model to LogRhythm entities for immediate use
- Plug into any existing Threat Intelligence Services or establish new ones
- Identify ArcSight correlation events and rules, mapping them to existing LogRhythm Advanced Intelligence Engine content

### Set Up Your Deployment & Begin Detecting Threats

With our ArcSight to LogRhythm Transition Service, we ensure a smooth integration of LogRhythm into your IT environment. We work with your team to get your new platform quickly deployed. We will:

- Set and configure LogRhythm base components
- Enable LogRhythm Diagnostics module content
- Collect log data (at least one of each log source type)
- Ensure Machine Data Intelligence (MDI) rule association
- Enable Core Threat Detection scenario-based analytics content
- Establish use of embedded incident orchestration response tools
- Adopt a playbook for handling activities recognized by Core Threat Detection, such as compromised accounts and endpoints

### Benefits of ArcSight to LogRhythm Transition Service

**Accelerate time to value** by working with an expert to transition from ArcSight to LogRhythm

**Recover previous work** through mapping ArcSight content to LogRhythm

**Jump-start threat detection** by deploying content from the Core Threat Detection module

**Establish effective monitoring**, investigation, and incident response processes immediately with LogRhythm out of the box
