

# Keeping Financial Services Secure

## Detect and Remediate Attacks with LogRhythm NextGen SIEM Platform

As the proliferation of financial data continues to grow, your organization faces the task of continuously protecting that information and keeping it secure, while maintaining your organization's reputation. With a growing cyberattack landscape and new technologies that transfer, process, store, and interact with financial data, LogRhythm helps you stay on top of financial data safety while quickly navigating threats and intrusions across endpoints.

The [LogRhythm NextGen SIEM Platform](#) provides the visibility and tools to quickly detect threats, from fraud for instance, keeping your organizations data, payment devices, and financial transfer systems secure.

## Monitoring the Network – Not Just Data

[MistNet NDR by LogRhythm](#) delivers next-generation threat detection and response utilizing cloud deployment, distributed computing and machine learning to do fast, scalable threat detection across desktops, data centers, and the cloud.

## Keeping Pace with Threats and Compliance

It's crucial to keep pace with the latest incidents and breaches that could pose a threat. [LogRhythm Labs](#) can help with a dedicated team that delivers use case content encompassing the latest information on emerging threats, changing compliance mandates, and security best practices.

## Simplify and Demonstrate Compliance Across the Globe

LogRhythm is experienced in helping financial organizations address their security concerns. Finance security teams rely on LogRhythm solutions to:

- **Improve detection, mitigation and response capabilities** with the all-in-one LogRhythm NextGen SIEM Platform that includes security orchestration, automation and response (SOAR), user entity behavior analytics (UEBA), and network detection and response (NDR)
- **Demonstrate geographical and global compliance** with fact-based evidence easily accessed and exported for audit reports. Compliance modules such as PCI DSS, GDPR, SOX, and GLBA come pre-packaged to keep your organization compliant
- **Reduce the time and cost** of compliance with out-of-the-box content developed and continually updated by LogRhythm Labs
- **Obtain real-time visibility** into events with LogRhythm's preconfigured alarms, reports, rules, and dashboards
- **Protect against insider threats** with UEBA monitoring for unusual activity, using machine learning to identify anything suspicious

# LogRhythm NextGen SIEM Platform Features and Benefits for Financial Services

<h2>Smart Security</h2>	<ul style="list-style-type: none"><li>• Flag weaknesses in authorizations that could put banks, payment transfer systems and financial data at risk</li><li>• Simplify compliance enforcement and reporting with prebuilt report packages, out-of-the-box responses, investigations, alarms, and integrations, all specifically mapped to individual controls of regulations such as PCI DSS, GLBA, GDPR and SOX</li><li>• Detect malware, data exfiltration and insider threats using prebuilt security analytics rules and behavioral analysis through machine learning</li><li>• Discover and identify devices on the network to help profile normal activity for different device types</li><li>• Protect data on disconnected devices with passive network monitoring</li><li>• Identify suspicious activity with system alerts and alarms</li><li>• Use customizable and flexible dashboard visualizations to fit IT environments and policies</li></ul>
<h2>Automation to Reduce SOC Team Effort</h2>	<ul style="list-style-type: none"><li>• Streamline workflows to help security teams combat evolving threats using RespondX (SOAR) features, including case management, case metrics, playbooks, and contextualization</li><li>• Reduce manual security tasks and platform switching with SmartResponse™ automation including more than 80 tested and certified automated actions with partner solutions</li><li>• Enrich data with contextual details and translate obscure log syntaxes to a consistent and predictable structure with support for over 800 third-party products</li><li>• Eliminate time spent writing scripts, building rules, and creating reports with automation</li><li>• Manage specific threats and reduce time to detect and respond to threats with repeatable processes and guides</li></ul>
<h2>Threat Intelligence</h2>	<ul style="list-style-type: none"><li>• Use machine learning to comprehend “normal” in IT and operational technology (OT), simplifying detection of behavioral anomalies that indicate an attack in progress</li><li>• Access a library of prebuilt compliance, threat, and operational risk-based content which is continually curated and updated by LogRhythm Labs</li><li>• Identify malicious activity, detect advanced threats, and protect systems from application vulnerabilities</li></ul>
<h2>Integrations</h2>	<ul style="list-style-type: none"><li>• Simplify deployment and maintenance with fully tested and certified prebuilt integrations</li><li>• Aggregate information from physical, virtual, and cloud sources using flexible data collection</li></ul>
