LogRhythm Training – Enterprise for Everyone

Flexible Training Options for Your Entire Team

We understand that training team members on security products and platforms isn't easy. It can be cost-prohibitive to train everyone you want. What's more, finding the time to attend training sessions can be tricky with competing priorities. And some employees may need additional training than what was originally budgeted.

To ease these challenges, the LogRhythm Training and Enablement team introduced a new training subscription called "Enterprise for Everyone." The subscription offers an affordable and flexible solution that eliminates the need for individual seat licenses and tokens, enabling your organization to offer unlimited training and unlimited courses to as many people as desired. The subscription is available to LogRhythm SIEM customers and partners.

Under the Enterprise for Everyone subscription, LogRhythm offers a series of product-specific courses to fit your needs and learning preference. This includes:

- **Self-Paced On Demand (SPOD) courses:** offer a flexible format that contain virtual machines for hands-on labs that learners can launch on their own or via a simulated lab using an asynchronous delivery
- **Instructor Led Training (ILT) courses:** this format features a live instructor (in-person or virtually delivered) via a synchronous delivery
- **Computer-Based Training (CBT):** also known as online mini courses, these short, self-paced courses are offered without an instructor

Subscriptions are available for 12- to 36-month terms and are sold in 12-month increments for new customers.

Benefits:

- **Access unlimited classes** to maximize your training
- **Accelerate your time to value** and your SIEM investment
- **Eliminate cost concerns** about unexpected training expenses
- **Take advantage of flexible payment options** with monthly installments

Features:

- **Choose course styles** that fit your schedule and needs
- **Reduce friction** with a token-free subscription offering
- **Maximize learning** with hands-on labs and interactive activities

Simplified Training Options

LogRhythm offers a variety of training options to get your team up to speed and accommodate users' hectic schedules. The LogRhythm Training and Enablement team simplified the learning paths to make it easier to get your team up and running quickly using LogRhythm products.

The Training courses are designed to be financially accessible regardless of your budget or the size of your team. Whether you are a team of two or are part of a larger group, our training options easily meet your needs.

Online Mini Courses:

Attendees can take these short format, self-paced computer-based courses on their schedule. These courses are offered without an instructor.

Course Name	Description	Duration	Role
What is SIEM?	Introduction to SIEM and use cases	1.5 hours	Analyst
Intro to LogRhythm: Administrators and Analysts	Explore the roles of admins and analysts using the LogRhythm SIEM platform	20-30 mins	Admin & Analyst
Foundations of the Web Console	Obtain best practices and guidance on using the Web Console	1.5-2 hours	Analyst
Foundations of the Client Console	Explore key SIEM administration skills in the Client Console	1 hour	Admin
What is NDR?	Learn about LogRhythm NDR	1 hour	Analyst
Axon User Basics: An Introduction to Axon	Understand key details on how to use LogRhythm Axon	1-2 hours	Admin & Analyst
Axon Administrative Basics	Ideal for users who need to set up, troubleshoot, and maintain the LogRhythm Axon platform	2-3 hours	Admin

Fundamental Courses:

Attendees can register for foundational product training for security administrators and analysts via in-depth learning paths for each role. Online training sessions are self-paced and are available on-demand. Virtual and in-person training sessions are eight-hour sessions led by an instructor, which begin at 8:30 a.m. local time.

Course Name	Description	Duration	Delivery Method	Role
301: LogRhythm Administration Fundamentals	Gain the skills and knowledge to handle common scenarios encountered in LogRhythm issue triage and Tier 1 support tickets	20-24 hours 3 full days	Online Virtual or In-Person	Admin
302: AI Engine Fundamentals	This course is suited for system admins and SIEM content creators who maintain and configure LogRhythm SIEM	6-8 hours 1 full day	Online Virtual or In-Person	Admin
304: LogRhythm Cloud Administration Fundamentals	Obtain best practices to perform administrative duties in a LogRhythm Cloud environment (This course is a combined version of 301 and 302 for cloud customers.)	12-16 hours 2.5 days	Online Virtual or In-Person	Cloud Admin
305: Analyst Fundamentals	This course is best for security analysts and other users who analyze data in the LogRhythm platform	10-12 hours 1 full day	Online Virtual or In-Person	Analyst

Focused Courses:

Focused courses are offered as virtual training sessions, which are led by an instructor.

Course Name	Description	Duration	Role
401: Custom MPE Rules Using Regular Expression	This course teaches participants how to configure LogRhythm to use custom Regular Expressions to parse data from log messages	2 full days	All technical users
402: Threat Detection with LogRhythm AI Engine	Expand your knowledge of the AI Engine Fundamentals Training with specific use cases that deepen your understanding of the advanced features of AI Engine	1 full day	All technical users

Partner Enablement Courses:

These courses are required for LogRhythm partners seeking to become Support Services and Deployment Services authorized partners (Managed Security Service Providers or MSSPs) and provide training on how to use, manage, support, and deploy a LogRhythm solution. Virtual and In-person training sessions are led by an instructor.

LogRhythm will review customer requests to take Partner Enablement courses. Contact CSM@logrhythm.com or your LogRhythm account team for more information.

Course Name	Description	Duration	Delivery Method	Role
320: LogRhythm Support Tier 1	Gain the skills and knowledge to handle common scenarios encountered in LogRhythm issue triage and Tier 1 support tickets	2 full days	Virtual or In-Person	Support Engineers & Admins
330: LogRhythm Installation and Deployment Training	This course covers platform review, server and component configuration, user management, alarm and report creation, Linux host configuration, and threat management foundations	3 full days	Virtual or In-Person	Sales Engineers, Consultants, & Advanced Admins

Access the complete guide to LogRhythm's training and certification programs via the Course Catalog.

LogRhythm Certifications Options

To get the most out of your training, LogRhythm offers several certifications on its products. They include:
